

Installer Accreditation & Competency

Importance of selecting the right installation partner

Heat Pumps for Social Housing

December 2008

Angela Wilson, GSHPA

www.gshp.org.uk

Ground Source Heat Pump Association

Formed in 2006; grew out of GSHP Club

- Encourage the growth and development of ground source heat pump industry in the UK
- Setting up & maintaining-high training standards
- Provide a forum for information interchange
- Liaise with other related organisations
- Represent the industry – local, national and international. See www.gshp.org.uk

A Successful Policy Framework needs:

- Good Policy Framework
 - **Quality** Scheme – Microgeneration Cert. Scheme
 - **Financial** Schemes – LCBP 1&2, CERT
 - **Regulation** Schemes – CSH, Merton
- Supported by flanking measures of:
 - **Training** – Installer, Designer and all stakeholders
 - **Public Awareness** – EST & Carbon Trust

Flanking measures

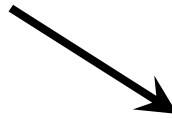

- **Training** – Installer, Designer & stakeholders
 - Stakeholders include architects, specifiers, planning permission & building control officers, trade association employees etc etc.
- **Public Awareness** – EST & Carbon Trust
 - All NGOs and consultants providing advice to both general public and other organisations.

Quality – Certification Scheme

- **Original Scheme**

- Clear Skies List
- Final closing 31st March 2009

Replaced by Microgeneration
Certification Scheme (MCS)

Contracting
